

Environmental policy

Our company is involved in manufacturing, processing and assembling high precision aluminium and zinc alloys and in manufacturing moulding forms and tools for its customers.

The demand for the quality, sustainability and improvement of the environment, as well as human health is growing worldwide. The management of our company has recognized that establishing and developing an environment-conscious corporate behavior is a basic condition for our ability to achieve our Company's short and long term objectives. Thus the management of our company committed to the safety of the environment, to the satisfaction of its compliance requirements, as well as for the continuous development of its environmental management system, for sake of increasing of it environmental performance.

Our company makes its activities with environmental conscious approach, according to the ISO 14001:2015 standard. We assert the necessity of implementing sustainable development, and to achieve it, we are making the following actions:

- We keep in mind the conservation of the good condition of the water, air and soil, and the protection of healthy environment.
- We take care for the minimalizing of the environmental load, harmful environmental impact of our processes.
- We choose the most environmental friendly solutions for the newly introduced technologies, newly installed equipments.
- We give high priority to the reduction in consuming primary natural resources, thus we require our suppliers to give preference to reusable materials, and encourage them to develop environment-focused control systems.
- In our production we make all efforts to optimize the consumption of base materials and energy.
- We constantly strive to reduce the quantity and levels of hazard of the waste produced in the course of the activity of our Company.
- We introducing new processes for the treatment of accidents- emergencies, and to avoid any environmental risks.
- Improving the skills and qualifications of our employees is a basic requirement in establishing an environment-focused approach and in increasing the safety of our workplace, so we aim at enhancing their improvement in this direction.
- Compliance with relevant laws, standards and requirements set forth by the government and other authorities, as well as with other requirements which we have undertaken. For this purpose we are in adequate communication with the government and other authorities.
- We continuously check and evaluate the achievement of our objectives in environment protection which we set forth in order to implement our Environment Policy.
- For the completion of our commitments we are guaranteeing the required resources for the company environmental focused management systems operation, as well as so our company's environmental performance can continuously improve.

The management of our company regards the cause of environment protection as an issue of high importance, thus the Company obliges each employee to contribute through their work to the implementation of our Environment Policy for the sake of continuous improvement.
